

Reduce Your School Fuel Bills & Save Energy with Quattro Seal

What is Quattro Seal?

Quattro Seal is a retrofit, unique flexible engineering gasket that is applied around windows and door frames to form a perfect seal around various degrees of gaps. Plus Quattro Seal also fills the peripheral gaps around frames to wall, under sills and service exit pipes. **Quattro Seal** was successfully developed over 20 years ago and has been **widely used across Public and Private Sector properties as a low cost, quick win energy saving measure.**

Quattro Seal can be applied to Wood, Metal, UPVC, Aluminium and Glass and is suitable for casements, Sliding Sash, Pivots, Louvre's windows and doors. Listed Buildings? No problem, Quattro Seal is recognised by English Heritage, is applied internally and can be removed without any damage to the underlining surface.

Windows work as before giving the benefits of Double Glazing at a fraction of the cost

Here is just a small selection of prestigious listed installations;

Tower of London,

Hampton Court Palace

Natural History Museum,

Houses of Parliament

Tate Gallery

City Hall Cardiff.

Quattro Seal is also installed in these academic institutions;

University of Plymouth

How is Quattro Seal applied?

The Installation

All works are carried out internally and as we offer a 24 hour service at no additional cost to you ensures we can deliver within your time scales. Quattro Seal is a no mess no fuss installation and all operatives are trained to the highest degree to ensure a smooth and on-time installation.

Energy Savings and Guarantee

Quattro Seal has been assessed by the BRE and carries an energy rating up to 27%.

We will produce free of charge a carbon saving report for your site which shows payback periods if applying for Salix funding, how much carbon we can save you and what it costs to save a tonne of carbon.

Our guarantee is unique in the fact that we give you five years unconditionally which covers labour and material and even vandalism in schools, thus ensuring your long term energy and financial savings.
